EDUCATION

University of Transport Ho Chi Minh City (UTH)

Bachelor of Data Science

Sep 2023 – March 2027 (Expected)

- **Major:** Data Science.
- **GPA:** 3.2/4.0
- **Core Coursework:** Statistics for Data Science, Database Management Systems, Data Analysis and Visualization, Python Programming, Machine Learning & Deep Learning (Basic).

HIGHLIGHTED PROJECTS

- **End-to-End E-Commerce Customer & Sales Analytics** (*GitHub, Streamlit Dashboard*)
 - Uncovered a 5.25-day logistics bottleneck by designing an ELT pipeline that processed 51,290 raw records into a normalized 3NF database using advanced T-SQL (CTEs, Window Functions).
 - Proposed 3 personalized marketing strategies to optimize ad spend and reduce churn by training a K-Means model that segmented 38,995 customers based on RFM behaviors.
 - Empowered stakeholders with real-time insights into \$7.81M revenue and 46.22% margin through a multi-page interactive Streamlit dashboard built with Plotly.
 - Languages & Technologies: SQL Server, Python, Streamlit.
 - **Ho Chi Minh City Housing Market Analysis 2021 – 2025** (*GitHub, Power BI Dashboard*)
 - Improved collection efficiency by 90% by engineering an automated Python web-crawling pipeline that collected 163,000+ listings from 4 major platforms.
 - Identified market segmentation and price distributions across districts through rigorous data cleaning and EDA on large-scale datasets.
 - Delivered actionable insights on property trends to stakeholders through high-performance Power BI dashboards built with DAX.
 - Languages & Technologies: Python (Selenium, BeautifulSoup), Power BI.
 - **Essential Commodity Price Analysis in Vietnam 2005 - 2025** (*GitHub, Power BI Dashboard*)
 - Ensured 100% data consistency across 20 years of pricing data for 7 essential commodities by standardizing multi-source datasets through Power Query.
 - Correlated long-term price fluctuations with major economic events (COVID-19, 2008 Financial Crisis) using DAX-driven visualizations to provide actionable insights into market volatility.
 - Languages & Technologies: Excel, Python, Power BI.
-
- **Python (Advanced):** Expert in data analysis (Pandas/NumPy), basic foundations in ML & DL pipelines and data collection experience.
 - **SQL (Proficient):** Complex queries, CTEs, and Window Functions.
 - **Power BI (Advanced):** DAX, Data Modeling, interactive dashboard design.
 - **AI & Tools:** Prompt Engineering, Agents Dev, Git/GitHub.
 - **Web & Data:** Node.js, D3.js, Excel (VBA/Pivot).

TECHNICAL SKILLS
